PROFESSIONAL SUMMARY & OBJECTIVE

Junior Fullstack Developer and IT Support specialist with hands-on experience building and maintaining high-performance enterprise systems and SaaS applications. Solid experience integrating REST APIs, synchronizing relational and NoSQL databases, and supporting cloud infrastructure environments and VPS servers. Focused on building scalable, reliable technology solutions centered on the operational efficiency of the business.

PROFESSIONAL EXPERIENCE

IT Support & Fullstack Developer – **Kybernan** **Jun 2026 – Present**

- **Fullstack & SaaS Development:** Development of high-performance SaaS and enterprise systems, implementing new features, business rules and user-experience-focused interfaces.
- **Infrastructure & Support:** IT infrastructure support, VPS server management (Easypanel) and continuous synchronization of critical routines and services.
- **Marketing & Communication:** Design and production of visual assets and creatives for marketing campaigns and product promotion.

Educational Robotics Consultant – **Maker Robotics** **Previous**

- **Algorithms & Programming:** Development and debugging of structured C algorithms for embedded systems.
- **Support & Quality:** Technical support for hardware and software components, hands-on testing and logic validation.
- **Technical Communication:** Mentoring students in computational logic, with an emphasis on clear teaching and teamwork.

FEATURED PROJECTS

Kyberrock | *Industrial Management & Truck Scale System* **Enterprise SaaS**

- Development and maintenance of quarry management software natively integrated with the OMIE ERP. Implemented a direct interface with the truck scale, handling heavy API consumption and complex data synchronization.

Kyberfood | *Ordering & Management Platform for Restaurants* **SaaS / Automation**

- Contributed to the development of a SaaS ecosystem with built-in AI, building features focused on operational automation, customer retention and improved usability.

SustentaAI | *Smart Sustainability Web Platform* **Academic Project / Web**

- Built a fullstack architecture integrated with the Google Gemini and Google Maps APIs. Implemented asynchronous validation, multimodal analysis (text/image) and geolocation of recycling points.

EDUCATION

Bachelor's in Information Systems – **FHO Uniararas** **Expected 2028 (In progress)**

Technical Diploma in Systems Development – **ETEC Deputado Salim Sedeh** **Completed 2024**

Professional Computing Course **2018 – 2021**

TECHNICAL SKILLS & COMPETENCIES

Programming Languages: JavaScript, C, Java (Object-Oriented Programming – OOP).

Databases: SQL, Supabase, Firebase.

Infrastructure, Tools & Cloud: VPS (Easypanel), Git, GitHub, Eclipse IDE, n8n, Claude Code, Google Gemini API.

Technical Skills & Architecture: Fullstack Development, REST API Integration and Consumption, Enterprise Software Implementation, SaaS Architecture, Algorithmic Logic and Best Practices (Clean Code).

Soft Skills: Continuous Learning and Active Curiosity, Clear Communication and Technical Translation, Critical Thinking and Constructive Questioning, Adaptability and Resilience, Collaboration and Teamwork, Organization and Time Management, Creativity.

Languages: Portuguese (Native), English (Intermediate).
